Dear Mr. Cardinal,

The Orlando VA Medical Center has always been a proponent of organizations that provide services to Veterans and their dependents. We are especially supportive of organizations that assist the children of our nation's heroes.

Organizations such as yours provide an excellent example of what can be done to invest in the future of this great nation. Providing services such as scholarships, education, housing, counseling, food assistance and financial assistance to the children of our Veterans, you do indeed provide a great service for our country.

Many of our staff are Veterans that have children, and we commend you and your organization for what you do.

Sincerely,
